NEVADA STATE BOARD OF ORIENTAL MEDICINE
APPLICATION FOR CREDIT APPROVAL OF CONTINUING EDUCATION
Pursuant to NAC 634A.137

Name of Applicant or Entity: Alyssa Wampole
Address: 1350 E Flamingo Rd #535 Las Vegas, NV 89119
Phone Number: 702-858-0623 Email: alyssa@lasvegasorientalmedical.com

I. Location and Address of the continuing education program: Blue Poppy Enterprises, Inc

II. Please fill out below:

Name of Instructor(s)	Degree of Instructor(s)	Date	Time: From To	CE Hours	Title of Course
Dr. Bruce Robinson	Medical Doctor	March 2016	at home study course	15 hours	Basics of Western Medicine: Neurology for the TCVM Practitioner

- III. One application per course must be submitted for review and approval.
- IV. Supporting documentation must include: all material relating to the course, including, without limitation, written material to be provided to a licensee attending the course; and
- V. The fee required pursuant to NAC 634A.165 of \$100 (per course).
- VI. The Board recommends including also a syllabus for the course in addition to a curriculum vitae for the instructor(s).
- VII. If the Board approves a course of continuing education pursuant to NAC 634A.137, the Board will determine the number of hours of continuing education that a licensee may receive for attending the course.

I swear that the above statement is nothing but true.

Course Summary

As Acupuncturists' services are more and more frequently being integrated into mainstream medical treatment facilities, many practitioners have a serious need to understand more Western medical terminology, physical examination procedures, and diagnostic parameters. This course is one of four programs in Blue Poppy's Basics of Western Medicine for Acupuncturists Series. Courses included in this series are: Neurology for the TCM Practitioner, Infectious Diseases, Musculoskeletal Diseases and Women's Health: Obstetrics, Gynecology, Breast Disease and Infertility. These courses are designed to teach acupuncture practitioners the basics of Western medicine and "medispeak" for each of these specialties.

Neurology for the TCM Practitioner covers:

The anatomy and physiology of the brain and nervous system
 The neurological exam: mental status
 Cranial nerve exam
 Motor exam, DTR's sensory, and gait
 Neurological symptoms
 When to refer the patient
 Diagnostic tests
 Headaches
 Cerebrovascular Disease and strokes
 Dizziness and vertigo
 Parkinson's disease
 Demential states
 Neuromuscular disorders
 Multiple Sclerosis and Amyotrophic Lateral Sclerosis
 Neurological complications of alcohol abuse
 Behavioral neurology
 Sleep disorders
 Seizures, epilepsy

Required Materials

These are the required materials for successful completion of this distance learning course. Please listen to the audio and read the accompanying lecture notes thoroughly until you feel you have gained mastery of them before attempting the final quiz.

NCCAOM Program Worksheet Practice Quiz

Are you ready to take the final quiz? Test your understanding of core materials first by taking the NCCAOM Program Worksheet Practice Quiz. In order to progress to the final quiz, you must pass the practice quiz with a score of 70 percent or higher. If you pass the practice quiz, but do not answer all of the questions correctly, we recommend reviewing all required materials again before attempting the final quiz.

- [NCCAOM Program Worksheet Practice Quiz](#)

Final Quiz

A minimum score of 70 percent on the final quiz is necessary to successfully complete this distance learning course. All answers to this quiz are based on the required materials section.

Curriculum Vitae for course instructor:

Dr. Bruce Robinson is author of the textbook:
Biomedicine: For Practitioners of Acupuncture & Oriental Medicine

Graduating with honors from the University of Michigan School of Medicine, Dr. Bruce Robinson completed another five years of post-graduate internship and residency at the university and a research fellowship at St. Bartholomew's Medical College in London. During his 30 year medical and surgical practice, Bruce treated over 80,000 patients. Now that he is no longer in practice, he has dedicated his professional career to bridging the gap between Western medicine and Traditional East Asian Medicine. He served as president and board chairman of Meridian Institute of Integrated Chinese Medicine, formerly located in Monterey, California. Bruce has been on several extensive trips to China and maintains close contacts there with medical universities located in Shanghai, Tianjin, and Beijing. He serves on the board of directors of the National Board of Internal Medicine for Acupuncturists and the Acupuncture and Integrated Medicine College in Berkeley and is the medical advisor for the Secara Herbal Corp.

Knowledge • Confidence • Success

Leslie Oldershaw, DAcup, MS, ND

Leslie Oldershaw is a licensed acupuncturist, nutritionist, and herbalist providing comprehensive care integrating Eastern and Western medicine to best serve the needs of her patients. Having studied health and nutrition for over 30 years, Leslie earned her Bachelor of Science degree in 1987 from the University of California at Berkeley, and her Master's degree in 1993 from the American College of Traditional Chinese Medicine in San Francisco, with advanced training in women's health and fertility. Leslie is nationally board certified in acupuncture and licensed as a primary care provider by the State of California.

As an undergraduate completing a pre-med curriculum, Leslie's academic focus was on a combination of biochemistry and ecosystems, thus cultivating an appreciation for the interactions that comprise a healthy, highly functional and dynamic living system. This foundation readily supported her study of the holistic paradigm of traditional Chinese medicine. Bringing the best of both worlds together for her patients, Leslie offers a blend of integrative medicine that consists of the holistic infrastructure offered by traditional Chinese medicine combined with modern Western medical science.

Leslie's long-standing interest in women's health and endocrinology led her to specialize in fertility; she has since developed a solid reputation in the Bay Area for helping patients integrate acupuncture, nutrition, stress reduction, lifestyle counseling, and herbal remedies along with Western fertility treatments to achieve optimal fertility.

A prolific writer and engaging public speaker, Leslie's passion for teaching has inspired numerous articles on the subjects of acupuncture, women's health, and fertility, and she frequently lectures on these subjects. Leslie maintains a private practice in Piedmont, California.

Course Outline:**900-1000 Introduction (1.0 BIOMED)**

- Summary of the information to be presented during the workshop, providing a framework to participants that will contextualize the myriad of details to follow.
- Timelines: A discussion of the appropriate timelines for performing the different lab tests; this will facilitate a better understanding of appropriate case management.
- Types of testing: This section will differentiate between blood, saliva, and urine tests, describing the pros and cons of each.

1000-1100 Basic fertility workup (1.0 BIOMED)

An introduction to the lab tests that comprise the basic fertility work-up, leading to a familiarity of what labs should be included.

- Diagnostic tests defined: In-depth examination of the individual markers found in the fertility work-up, resulting in a more thorough understanding of the lab tests.

1100-1200 Comprehensive wellness panel (1.0 BIOMED)

An introduction to the lab tests that comprise a comprehensive wellness panel, leading to a familiarity of what labs should be included.

- Diagnostic tests defined: In-depth examination of the individual markers found in the comprehensive wellness panel, resulting in a more thorough understanding of the lab tests.

1200-100 LUNCH**1100-200 Lab tests (1.0 BIOMED)**

Review of spreadsheet containing reference ranges for various lab tests:

This document provides a quick reference for evaluating lab results; reviewing this synopsis will serve to summarize the lab tests used to evaluate fertility and reproductive health.

200-300 Assessment of Lab Markers (1.0 BIOMED)

This section delves into the nuanced interpretation of lab markers to establish a pattern of imbalance and/or pathology.

300-400 Case management (1.0 BIOMED)

In the final hour we will focus on the practical application of the information derived from lab tests in the clinical setting. How do the numbers help to determine the most suitable treatment options? When is it appropriate to refer to a specialist?

Lab Testing and Hormonal Assessment for Infertility: Treatment success depends on diagnosing the real cause

- B. The menstrual cycle
- C. The pituitary – ovarian axis
- D. The thyroid cascade
- E. Lab results spreadsheet including reference ranges

1. INTRODUCTION:

◆ Lab tests are a valuable assessment tool. They allow the clinician a behind-the-scenes look at the functional metabolism of the patient, providing both an initial diagnosis and a benchmark for measuring the success of a treatment plan. In the world of fertility, lab tests are a common language shared by different practitioners. While the topic may at first appear complicated, with a little time and familiarity the alphabet soup begins to sort itself into a discernible pattern.

1. INTRODUCTION:

◆ Let us consider what is needed in order to conceive: sperm, eggs, open fallopian tubes, and a healthy uterine environment. Age is the one factor that affects fertility for all women. The most important task of the fertility specialist is to assist patients in maximizing their window of opportunity. The ability to spot red flags in a patient's work-up will allow the practitioner to effectively guide the patient in considering the most appropriate options in a timely fashion.

Lab Testing and Hormonal Assessment for Infertility:

Treatment success depends on diagnosing the real cause

1. INTRODUCTION:

- ◆ Red flags include male fertility factor (poor sperm), diminished ovarian reserve (an indicator of both potential egg quantity and quality), blocked fallopian tubes, an impaired uterine environment, and any other significant metabolic or hormonal imbalances that may interfere with one's fertility.

2. TIMELINES:

- ◆ The comprehensive wellness panel is preferably done at the beginning of treatment as part of the initial work-up.
- ◆ A semen analysis is best performed as early as possible in the treatment timeline.
- ◆ The fertility workup for women is age dependent:
 - ◆ At 30 years old: completed after one year of trying to conceive
 - ◆ At 35 years old: completed after 6 months of trying to conceive
 - ◆ At 40 years old: completed before trying to conceive

3. TYPES OF TESTING:

- ◆ Blood (a.k.a. serum) – conventional, widely used
- ◆ Saliva – cost effective, suitable for tests that require several samples such as the Adrenal Stress Index
- ◆ Urine – best suited for “yes” or “no” results, such as the LH (Luteinizing Hormone) surge with ovulation predictor kits, or home pregnancy tests; unable to give quantified results
- ◆ Diagnostic imaging – used for hysterosalpingograms (HSG), ultrasounds (U/S), and antral follicle counts (AFC)

Lab Testing and Hormonal Assessment for Infertility: Treatment success depends on diagnosing the real cause

A NOTE ON TOTAL, PROTEIN-BOUND, AND FREE-FRACTION HORMONE LEVELS:

- ◆ Hormones exist in two forms in the body. At any given time, approximately 95% - 98% of a particular hormone is bound to protein, which allows it to be transported in the bloodstream. When the hormone is released from the protein, it is known as a free hormone and is now in its active state. The total refers to the combination of the protein-bound and free-fraction hormones

A NOTE ON TOTAL, PROTEIN-BOUND, AND FREE-FRACTION HORMONE LEVELS:

- ◆ With blood testing, hormones are measured as total hormones unless otherwise specified as free hormones.

A NOTE ON TOTAL, PROTEIN-BOUND, AND FREE-FRACTION HORMONE LEVELS:

- ◆ With saliva testing, all hormone levels are free-fraction hormones

#15

NRS 353.1465 Acceptance of credit cards, debit cards and electronic transfers of money:
Prerequisites; fees for use; regulations.

1. Upon approval of the State Board of Finance, a state agency may enter into contracts with issuers of credit cards or debit cards or operators of systems that provide for the electronic transfer of money to provide for the acceptance of credit cards, debit cards or electronic transfers of money by the agency:

(a) For the payment of money owed to the agency for taxes, interest, penalties or any other obligation; or

(b) In payment for goods or services.

2. Before a state agency may enter into a contract pursuant to subsection 1, the agency must submit the proposed contract to the State Treasurer for his or her review and transmittal to the State Board of Finance. The agency shall coordinate the administration of the contract with the State Treasurer to ensure that the State Treasurer is able to track and reconcile payment information pursuant to the contract.

3. Except as otherwise provided in subsection 4, if the issuer or operator charges the state agency a fee for each use of a credit card or debit card or for each electronic transfer of money, the state agency may require the cardholder or the person requesting the electronic transfer of money to pay a convenience fee when appropriate and authorized. The total convenience fees charged by the state agency in a fiscal year must not exceed the total amount of fees charged to the state agency by the issuer or operator in that fiscal year.

4. A state agency that is required to pay a fee charged by the issuer or operator for the use of a credit card or debit card or for an electronic transfer of money may, pursuant to NRS 353.148, file a claim with the Director of the Office of Finance for reimbursement of the fees paid to the issuer or operator during the immediately preceding quarter.

5. The Director of the Office of Finance shall adopt regulations providing for the submission of payments to state agencies pursuant to contracts authorized by this section. The regulations must not conflict with a regulation adopted pursuant to NRS 360.092 or 360A.020.

6. As used in this section:

(a) "Cardholder" means the person or organization named on the face of a credit card or debit card to whom or for whose benefit the credit card or debit card is issued by an issuer.

(b) "Convenience fee" means a fee paid by a cardholder or person requesting the electronic transfer of money to a state agency for the convenience of using the credit card or debit card or the electronic transfer of money to make such payment.

(c) "Credit card" means any instrument or device, whether known as a credit card or credit plate or by any other name, issued with or without a fee by an issuer for the use of the cardholder in obtaining money, property, goods, services or anything else of value on credit.

(d) "Debit card" means any instrument or device, whether known as a debit card or by any other name, issued with or without a fee by an issuer for the use of the cardholder in depositing, obtaining or transferring funds.

(e) "Electronic transfer of money" has the meaning ascribed to it in NRS 463.01473.

(f) "Issuer" means a business organization, financial institution or authorized agent of a business organization or financial institution that issues a credit card or debit card.

(Added to NRS by 1997, 1321; A 2001, 1321; 2003, 20th Special Session, 21; 2009, 1572; 2011, 2556)

NRS 353.1466 Acceptance of credit cards, debit cards and electronic transfers of money: Entry of state agency into contract; entry of Director of Office of Finance into contracts for participating state agencies; reports by state agency that fails to enter or participate in contract.

1. Except as otherwise provided in subsection 2, a state agency shall seek and obtain the approval of the State Board of Finance to enter into a contract for the acceptance of credit cards, debit cards or electronic transfers of money pursuant to NRS 353.1465 unless it is impracticable for the agency to enter into such a contract.

2. The Director of the Office of Finance may enter into one or more contracts with issuers of credit cards or debit cards or operators of systems that provide for the electronic transfer of money to provide for the acceptance of credit cards, debit cards or electronic transfers of money by any state agency that chooses to participate in the contract. The Director must obtain approval of the State Board of Finance in the manner required pursuant to NRS 353.1465 for such a contract, and the contract is subject to the requirements of that section. If a state agency participates in such a contract, it is not required to seek and obtain approval to enter into a contract pursuant to subsection 1.

3. A state agency that has not entered into a contract pursuant to NRS 353.1465 or is not participating in a contract pursuant to subsection 2 shall report to the Legislative Commission and the Interim Finance Committee on or before July 1 of every even-numbered year concerning the reasons that the agency has failed to enter into or participate in such a contract, including any supporting financial information, and the efforts the agency is taking to allow it to enter into or participate in such a contract in the future.

(Added to NRS by 2011, 2555)
