

I would like to thank Dr. Priestman for the delightful political theater performance she gave at our last meeting. Unfortunately, Dr. Priestman didn't do her homework and her allegations are 100% disassociated from fact and reality. In 2016, the Nevada Legislature's Sunset Committee SPECIFICALLY tasked this board with actively working to increase the number of licensed Oriental Medicine doctors. We have made bi annual reports to the committee detailing the number of applicants and new licensees to comply with the legislature's specifically enumerated requirement to this board to increase the number of Oriental Medicine doctors. Dr. Priestman's political grandstanding was a transparent and bumbling attempt to score political points with other physical therapists at the expense of the truth. In the future, for the benefit of the state of Nevada, I hope that anyone who appears to make public comment, especially someone who is a representative of a trade association and has a responsibility to the truth, will make a mature, responsible attempt at understanding the facts of a situation before making specious and inflammatory comments that impugn the integrity of this Board.

Dr. Lisa Grant, OMD

Secretary/Treasurer, NVEOM

*Lisa Grant OMD 5/5/19*
