Knowledge • Confidence • Success

## Module 1 - Western Reproductive Endocrinology - Normal and Abnormal Sexual Development

This module is designed to give the participants the tools necessary to differentiate normal and abnormal sexual development.

1. Normal Sexual Differentiation
2. Abnormal Sexual Differentiation
3. Masculinized Females
  - Incompletely Masculinized Males
  - Abnormal Androgen Synthesis
  - Disorders of Gonadal Development
  - True Hermaphroditism
  - Gonadal Dysgenesis
  - Noonan Syndrome
  - Diagnosis of Ambiguous Genitalia
  - Describe the hormonal changes relative to the reproductive cycle
  - Define the concepts of gonadostat, adrenarche, premature adrenarche, premature thelarche
  - Describe the normal sequence of age of onset of female pubertal milestones
  - Detail the differential diagnosis and workup and treatment of disorders producing precocious puberty
  - Detail the Differential Diagnosis of delayed puberty

## Module 2 - Western Reproductive Endocrinology - Amenorrhea and Anovulation and PCOS (Unedited version)

To acquire knowledge pertaining to the concepts related to differential diagnosis of amenorrhea of all types utilizing procedures available to all clinicians. This module will also include the problems of galactorrhea and pituitary adenomas, exercise and amenorrhea.

To acquire knowledge pertaining to the concepts related to how loss of ovulation can occur and the clinical expressions of anovulation. This module will also include the polycystic ovary and hyperinsulinemia.

Module 2 Outline:

- Definition of Amenorrhea
- Basic Principles in Menstrual Function
- Evaluation of Amenorrhea
- High Gonadotropins
- Low Gonadotropins
- Hypogonadotropic Hypogonadism
- Specific Disorders within Compartments
- ->Compartment I: Disorders of the Outflow Tract or Uterus
- ->Compartment II: Disorders of the Ovary
- ->Compartment III: Disorders of the Anterior Pituitary
- Pathogenesis of Anovulation
- The Polycystic Ovary
- Insulin Resistance, Hyperinsulinemia, and Hyperandrogenism
- The Clinical Consequences of Persistent Anovulation

## Module 3 - Western Reproductive Endocrinology - Female and Male Infertility

To acquire knowledge pertaining to the concepts related to an approach to the problem of infertility in females and males

Module 3 Outline:

- The Epidemiology of Infertility in the U.S.
- Aging and Female Fertility
- Guiding Principles in the Evaluation of Infertility
- The Female Infertility Evaluation
- Male Factor: Abnormalities of Semen Quality

- Ovarian Factors: Ovulatory Dysfunction
- Cervical Factor: Abnormalities of Sperm-Mucus Interaction
- Uterine Factor: Anatomic and Functional Abnormalities
- Tubal Factors: Tubal Occlusion and Adnexal Adhesions
- Unexplained Infertility
- Adoption
- Explain the basic anatomy and physiology of the male reproductive system
- Describe the components of a semen analysis and the possible reason each parameter is abnormal
- Detail the methods and principles of the sperm penetration assay (SPA) and the immunobead assay
- Discuss the arguments in favor and against varicocele repair
- Understand the possible benefits and side effects associated with gonadotropin superovulation and IUI

#### **Module 4 - Western Reproductive Endocrinology - Recurrent Early Pregnancy Loss and Endometriosis**

To acquire knowledge pertaining to the concepts related to the evaluation and management of recurring spontaneous losses in early pregnancy. To acquire knowledge pertaining to the concepts related to diagnosis and suitable treatment for the individual patient.

##### Module 4 Outline:

- The Epidemiology of Pregnancy Loss
- Genetic Factors
- Anatomic factors
- Immunologic Factors
- Inherited Thrombophilia's
- Endocrine Factors
- Infectious Causes
- Environmental Factors
- Unexplained Recurrent Pregnancy Loss
- Summary of Evaluation and Treatment for Recurrent Pregnancy Loss
- The Pathogenesis of Endometriosis
- Epidemiology of Endometriosis
- Diagnosis of Endometriosis
- Medical Treatment
- Surgical Treatment
- Prevention of Infertility

Paul Magarelli, M.D., PH.D., F.A.C.O.G

If you ask anyone in Colorado about Dr. Paul Magarelli they will tell you that he makes babies for a living. Dr. Magarelli and his team, HQA Fertility Centers, have served Colorado and the Western Region as a Reproductive Endocrinologist and Infertility Specialist since 1998. Over 1,000 babies are part of his legacy, and he has only just begun. His motto of practice began as "High Tech with a Personal Touch" then evolved to "We Heal by Creating Families in an Affordable way". Recently Dr. Magarelli decided to spearhead a change in how Reproductive Medicine is practiced in the United States. He did this by creating HQA-Fertility Care (said HiKu). High Quality Affordable Fertility Care is a revolutionary approach to helping infertility patients get access to all types of fertility care, including High Tech in the forms of IVF/ICSI and Comprehensive Chromosomal Screening (CCS/PGD), at incredibly affordable prices. He changed the average fee for IVF from \$ 13,000 to \$ 4,800 and the typical fees for CCS/PGD from over \$ 36,000 to \$ 8,000. This is a major shift in the accessibility and affordability of infertility care. He did this while preserving his signature 5 Star service guarantee: he and his staff will provide care in a pleasant, compassionate, competent and respectful fashion. He also created a program in which patients with cancers that may make them permanently infertile, can have an IVF cycle at no fee and this includes medications. He is now advancing care for our military with his Compassionate Corps™ program in which soldiers that have injuries that may affect their fertility can have their IVF medications for two IVF cycles ... free.

Dr Magarelli and his wife, Diane K Cridennda, L.Ac., Doctor of Oriental Medicine (NMex), of East Winds Acupuncture in Colorado Springs originated the research to incorporate Acupuncture into IVF treatment cycles. Their C-MAP protocol (Cridennda Magarelli Acupuncture Protocol) is used worldwide to help infertility patients create "One Healthy Baby™". Both Dr. Mag and Dr. Diane founded and serve on the American Board of Oriental Reproductive Medicine and both are invited lecturers worldwide on topics that range from infertility to Polycystic Ovarian Syndrome (PCOS), Menopause, Andropause and the treatment of Insulin Resistance.

Dr. Magarelli designed the nation's first comprehensive clinic to treat Insulin Resistance and its sequelae of diabetes, hypertension, low testosterone, depression, andropause, fatigue and more in his clinic called the Institute for Sustained Health™.

Dr. Magarelli remains the only RE in the city with the ability to diagnose and **treat** folks both locally, nationally and internationally. He is a graduate of Duke University Health Sciences Residency and UCLA RE Fellowship program. He earned his Ph.D. in Nutritional Biochemistry and Physiology at the University of Arizona. Recently he was elected President of the nations' oldest regional fertility organization, the Pacific Coast Reproductive Society.
